## DETAILED ACTION

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to a compound, classified in class 514, subclass 2.
- II. Claims 32-44, drawn to a method of inhibiting human immunodeficiency virus infection of a CD4+ cell, classified in class 424, subclass 188.1.
- III. Claims 45-63, drawn to a method of identifying an agent which inhibits binding of a CCR5 ligand to a CCR5 receptor, classified in class 435, subclass 7.1.
- IV. Claim 64 and 66, drawn to a composition, classified in class 514, subclass 2.
- V. Claims 65-66, drawn to a composition, classified in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

The inventions of groups I, IV and V are patentably distinct from each other because they are drawn to different products having different structure and functions. The polypeptides of groups I, IV and V are composed of amino acids linked by peptide bonds and can assume complex tertiary structures. The polypeptides are structurally distinct chemical compounds and are unrelated to one another.

The inventions of groups II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have

different modes of operation, different functions, or different effects (MPEP 806.04, MPEP 808.01). In the instant application, the different inventions have different functions. The invention of group II is to inhibit human immunodeficiency virus from infection a CD4+ cell. The invention O f group III is identifying an agent which inhibits binding of a CCR5 ligand to a CCR5 receptor.

Because the inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. See 37 CFR 1.143.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy Teller whose telephone number is (703)305-4243. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.
